TECHNOLOGICAL SKILLS

Cataglaze+

CATAGlaze®+

Antibacterial protection 99,99%

The innovative antibacterial glaze is standard on all Catalano products.

Cataglaze+ Silver Titanium is an innovative treatment that not only reduces limescale deposits but makes cleaning ceramic sanitary ware easy through its powerful antibacterial action against germs and bacteria. The effectiveness of the new formula is ensured by the presence of silver and titanium ions in the blend. Antibacterial action is ISO 22196 certified with an effectiveness of 99.99%

Silver Titanium

Constant research in the Catalano laboratories has resulted in a glaze that effectively takes advantage of the special chemical properties of silver and titanium particles. With these metals it has been possible to perfect a high performance composite glaze with excellent antibacterial properties.

Resistance to Chemical Agents

Cataglaze+ resists the corrosive effects of chemical agents found in cleaning products. Surfaces retain their shine and smoothness even after long exposure to these substances.

Respect for the Environment

Cataglaze+'s ability to resist translates into less use of chemical detergents and water and more protection for health and the environment.

Quick and Easy to Clean

Cataglaze+ makes cleaning much faster, easier and convenient and saves time and water.

Antibacterial Protection

Cataglaze+ adds antibacterial protection on the surface itself, preventing bacteria from growing and spreading and making the bathroom environment safer and more hygienic.

Twinglaze+

Twinglaze+

Twinglaze+ is an innovation featured on Catalano coloured wc's. The antibacterial treatment Cataglaze+ is applied with a glossy effect on the internal surfaces and matt on the outside.

Twinglaze+ is a treatment that adds high tech value to the product while ensuring hygiene, respect for the environment and a modern and refined look.

Catalano's special technology reduces limescale and improves flushing by reducing water attrition and optimizing consumption.

Soft Close

Quick Release

Antibacterial

Toilet seat covers

Soft Close

The Soft Close closing system is a function that allows the seat to close slowly and in a controlled manner, avoiding sharp noises and accidental damage. Besides closing quietly, it offers more comfort and safety.

Antibacterial

For total WC protection, all seats are produced with FDA and EPA registered resins and antibacterial coatings that prevent the growth of germs and the proliferation of bacteria through the natural action of silver ions.

Quick Release

The quick uncoupling system makes removing the seat easier and faster without the need for tools. The seat is raised upwards in a single movement facilitating cleaning and maintenance.

Silentech

Silentech

The system Silentech, invented by Catalano, is the most advanced rimless flushing system on the market. The absence of a surrounding rim, where germs and bacteria tend to congregate, guarantees maximum hygiene and makes the job of cleaning easier.

The new system has many advantages: a new design that optimizes performance in terms of hygiene, noise reduction and sustainability; it gives the WC a contemporary aesthetic; the swirling flow of water sets off a powerful mechanical action over the surface for impeccable cleanliness and so less need for chemical detergents; less noise; less consumption.

Vortex flushing

More silence

Silentech without rim

More hygiene

Anti-scratch

Gold&Silver antiscratch glaze

Through a complex, exclusive and extremely precise process, the precious Gold&Silver finishes are coated with a special antiscratch glaze that makes them resistant to abrasions, detergents and temperature changes just like a traditional finish. In addition, the antiscratch coating maintains the gloss of the metallic surface and protects it from the signs of wear.

TECHNOLOGICAL SKILLS

Save Water

Save Water

Catalano's flushing systems have been designed to use considerably less water (4.5 litres) than traditional systems which employ twice as much. This important difference translates into significantly lower water consumption, thereby reducing the impact on the water supply and conserving limited water resources.

A fundamental action for environmental sustainability and a policy Catalano adopts every day across its entire production chain.
