

STAR

CATALANO
THE ESSENCE OF CERAMICS

Il progetto Star riafferma, attraverso il suo design sottile e leggero, la più recente linea di ricerca della Catalano, un filone di sperimentazione nell'ambito dei sanitari teso alla realizzazione di prodotti caratterizzati da superfici perfette e leggere, da geometrie rigorose ed estreme, attraverso la massima riduzione dello spessore della ceramica. La collezione si caratterizza per la sua sottigliezza e per una linea elegante e squadrata, unica e distintiva.

New collection Star reaffirms, through its thin and light design, the most recent line of research of Catalano, a constant experimentation to create sanitary-ware items with perfect and smooth surfaces, with rigorous and extreme geometric shapes, by reducing the ceramic to its minimum thickness. This collection is therefore characterized by its slimness and its elegant and square-shaped outline, unique and distinctive.

Das Projekt Star mit seinem dünnen und leichten Design ist die neueste Linie der Catalano-Forschung, die auf Sanitärprodukte mit perfekten und leichten Oberflächen, akkuraten und extremen Formen sowie den geringstmöglichen Einsatz von Keramik abzielt. Die Kollektion zeichnet sich durch ihre feinen, eleganten, rechteckigen und einzigartigen Linien aus.

Nuovo smalto | New glaze | Neue glasur

L'impegno della Catalano per il rispetto dell'ambiente e della qualità della vita:

l'innovazione totale nel mondo della ceramica: uno speciale smalto che la rende inattaccabile ed inalterabile, fondendosi a 1250° con la ceramica stessa. Questa rivoluzionaria smaltatura crea una differenza immediatamente percepibile con le superfici tradizionalmente trattate, poiché CATAGLAZE:

- non si deteriora
- non perde lucentezza
- conserva integra la sua levigatezza
- ha una durata di vita lunga quanto la ceramica stessa
- aumenta la resistenza agli agenti chimici aggressivi

Barriera totale a prova di igiene:

CATAGLAZE, creando una superficie perfettamente liscia e planare, elimina i micro-avvallamenti della ceramica, evitando per sempre allo sporco di aderire e garantendo:

- igiene totale
- pulizia facile e rapida
- minore utilizzo di detergenti
- rispetto dell'ambiente per il minor inquinamento
- perfetta levigatezza
- maggiore brillantezza
- a prova di calcare

Catalano's commitment for environment safeguard and life quality:

the total innovation in the world of ceramics: a special glaze that makes it unassailable and unalterable, blending at 1250° with the ceramics itself. This revolutionary glazing creates an immediately noticeable difference with traditionally treated surfaces, because CATAGLAZE:

- doesn't deteriorate
- doesn't lose brightness
- preserves all its smoothness
- its lifecycle is long as the ceramics itself.
- increases the resistance to aggressive chemicals

Total bacteria-proof barrier:

CATAGLAZE, creating a perfectly smooth and flat surface, eliminates the micro-depressions of ceramics, and does not allow dirt to stick on it anymore, guaranteeing:

- maximum hygiene
- easy and quick cleaning
- less use of detergents
- less pollution for the environment
- perfect smoothness
- more brightness
- limestone-proof

Das Engagement von Catalano für Umweltschutz und Lebensqualität:

die absolute Innovation in der Welt der Keramik: eine spezielle Glasur, die bei 1250° mit dem Material verschmilzt und es so unangreifbar und höchst beständig macht. Diese revolutionäre Emaillierung schafft einen sofort wahrnehmbaren Unterschied zu traditionell behandelten Oberflächen, da CATAGLAZE:

- seine Qualitätsmerkmale unverändert beibehält
- nicht matt wird
- seine Glätte makellos erhält
- über eine Lebensdauer verfügt, die der der Keramik entspricht
- die Beständigkeit gegenüber aggressiven Chemikalien erhöht

Hygienesichere Schutzbarriere:

CATAGLAZE beseitigt die Mikrovertiefungen der Keramik und schafft eine vollkommen glatte und ebene Oberfläche, wodurch Schmutzanhäufungen über die gesamte Lebensdauer des Produktes verhindert und zahlreiche Vorteile garantiert werden:

- absolute Hygiene
- einfache und schnelle Reinigung
- geringerer Einsatz von Reinigungsmitteln
- Umweltschutz durch eine geringere Verschmutzung
- perfekte Glätte
- mehr Glanz
- keine Bildung von Kalkablagerungen
